CORE CAPABILITIES

- AI product development
- Full-stack web apps
- OAuth and API integrations
- SaaS MVP development
- Supabase and PostgreSQL
- Vercel deployment
- Testing and debugging
- Product and UX thinking

WORKING STYLE

- Clear scope
- Rapid iteration
- Security-aware
- Transparent progress

SCAN THE
LIVE BUILDAgent One
on VercelI BUILD IDEAS INTO
WORKING AI PRODUCTS.

I design and launch secure, user-friendly AI products, SaaS MVPs, and workflow automations. My work combines product thinking, interface design, real API integrations, cloud deployment, and practical security - taking an idea from concept to a usable web experience.

HOW I CAN HELP

01 AI + SaaS MVPs

Functional web products designed around a clear customer outcome.

02 Integrations

OAuth, databases, AI APIs, Notion, authentication, and workflows.

03 Launch + Improve

Deployment, testing, debugging, security controls, and iteration.

FEATURED BUILD

AGENT ONE

Personal AI workspace and Notion command center

A working web application that authenticates users, connects approved Notion workspaces, visualizes their content, and supports controlled voice and text AI assistance.

- Supabase authentication and PostgreSQL
- Real Notion OAuth and workspace sync
- Interactive information map
- Secure server-side credential handling
- Confirmation, activity, and undo patterns
- Automated tests and Vercel deployment
